

HOSPITAL MANAGEMENT SYSTEM

Admission - Simple Reporting Structure

CH Sharif and Saeed Hospital | Prepared by iSysware

Simple inpatient reporting for admissions, beds, payment status, Pharmacy coordination and discharge.

Design Goal

School Management System style: simple report menu on the left, proper filters on top, export buttons on the right, and one clean table below. Keep the reporting easy to read and easy to manage.

Portal Rule

Admission manages the inpatient lifecycle but does not collect Hospital cash.

1. Recommended Report Menu

Report	Purpose / Main Columns
1. Admission Summary	Period totals: admissions, discharges, active patients, occupied/available beds, pending discharge, Hospital outstanding.
2. Admission Register	Admission No, patient, Panel/Self-Pay, department, doctor, ward/room/bed, admit date/time, discharge date/time, status.
3. Inpatient Census / Bed Report	Current admitted patients + ward/room/bed + occupied/available bed information. Use tabs or a single combined screen.
4. Transfer / Length of Stay	Transfer history plus LOS: from/to ward/room/bed, transfer time, reason, admit/discharge times, LOS.
5. Running Hospital Bill / Payment Status	Hospital charges, Billing-collected payments, Hospital outstanding, latest receipt/payment status. Read-only payment history.
6. Pharmacy Request & Fulfillment	Medicine, requested qty, urgency, request status, dispensed qty, Pharmacy invoice/clearance, high-cost approval status.
7. Discharge Clearance Report	Clinical Ready, Hospital Clearance, Pharmacy Clearance, outstanding/credit status, discharge date/time, completed by.

2. Top Filters for Each Report

Report	Top Filters
Admission Summary	From Date, To Date, Department, Ward, Doctor, Status
Admission Register	From Date, To Date, Department, Doctor, Ward, Panel/Self-Pay, Admission Status
Inpatient Census / Bed	As-of Date, Department, Ward, Room/Bed, Bed Status
Transfer / LOS	From Date, To Date, Admission No, Department, Ward, Doctor
Hospital Bill / Payment Status	From Date, To Date, Admission No, Department, Payment/Clearance Status
Pharmacy Request & Fulfillment	From Date, To Date, Admission No, Medicine, Request Status, Approval Status
Discharge Clearance	From Date, To Date, Department, Doctor, Clinical Status, Hospital Clearance, Pharmacy Clearance

3. Recommended Reporting UI

UI Area	Recommended Pattern
1. Report Title Bar	Report name + short description.
2. Top Filter Row	Date range + 3-5 relevant dropdowns. Keep filters in one horizontal row where screen width allows.
3. Action Buttons	Filter / Refresh + Reset + Excel + PDF + Print.
4. Optional KPI Strip	Only 3-5 important totals; do not overload every report with cards.
5. Main Data Table	Clean grid like the school system reference; sortable, searchable, paginated.
6. Row Action	View only where detail drill-down is useful. Avoid too many action buttons.

Simple Layout Example

Report Name

Date From | Date To | Department/User/Status | Payment Method/Panel (where relevant) | **Filter** | Reset

Excel | PDF | Print

Main report table with totals at the bottom. Use KPI cards only on summary reports.

4. Final Notes

Note

Admission does not collect Hospital cash. It only sends payment requests and sees payment/receipt status returned from Front Desk/Billing.

Note

No Balance Sheet and no Account Settlement should be shown inside Admission Portal.

Note

Hospital Bill and Pharmacy Bill remain separate. Discharge report shows both clearance states separately.
