

HOSPITAL MANAGEMENT SYSTEM

Front Desk / Billing - Simple Reporting Structure

CH Sharif and Saeed Hospital | Prepared by iSysware

Simple cashier and billing reporting with Balance Sheet and Account Settlement.

Design Goal

School Management System style: simple report menu on the left, proper filters on top, export buttons on the right, and one clean table below. Keep the reporting easy to read and easy to manage.

Portal Rule

Front Desk/Billing collects Hospital patient payments and owns cashier Balance Sheet + Account Settlement.

1. Recommended Report Menu

Report	Purpose / Main Columns
1. Daily Billing Summary	Today/period totals: invoices, gross billed, discounts, net billed, collections, outstanding. This is the main summary screen.
2. Encounter Register	Encounter No, patient, OPD/Emergency/Observation, department, doctor, date/time, status, Created By.
3. Invoice Register	Invoice No, patient, department, gross, discount, net, paid, balance, status.
4. Collection & Receipt Report	Receipt No, invoice/admission no, patient, amount, method, date/time, Collected By.
5. Outstanding / Partial Invoices	Invoice No, patient, net, paid, outstanding, last payment, status.
6. Admission Payment Collections	Admission No, patient, Hospital due, amount collected, receipt, method, remaining Hospital due.
7. Discounts / Refunds / Voids	One combined exception report with type filter: discount, refund, void, reversal; amount, reason, performer, approver.
8. My Balance Sheet	Opening/Petty Cash, Cash Collections, Cash Expenses, Cash Refunds, Expected Cash, Physical Cash, Variance, Settled, Remaining.
9. My Account Settlement	Settlement Ref, period, expected cash, physical cash, variance, submitted amount, accepted amount, remaining cash, status.

2. Top Filters for Each Report

Report	Top Filters
Daily Billing Summary	Period / From Date / To Date, Cashier, Department
Encounter Register	From Date, To Date, Encounter Service, Department, Doctor, Status
Invoice Register	From Date, To Date, Department, Payment Status, Panel/Self-Pay
Collection & Receipt	From Date, To Date, Payment Method, Receipt Status, Cashier
Outstanding / Partial	From Date, To Date, Department, Status, Panel/Self-Pay
Admission Payments	From Date, To Date, Admission No, Department, Payment Method, Status
Discounts / Refunds / Voids	From Date, To Date, Type, Status, Approved By
My Balance Sheet	Shift / Day / Custom Period
My Account Settlement	From Date, To Date, Settlement Status

3. Recommended Reporting UI

UI Area	Recommended Pattern
1. Report Title Bar	Report name + short description.
2. Top Filter Row	Date range + 3-5 relevant dropdowns. Keep filters in one horizontal row where screen width allows.
3. Action Buttons	Filter / Refresh + Reset + Excel + PDF + Print.
4. Optional KPI Strip	Only 3-5 important totals; do not overload every report with cards.
5. Main Data Table	Clean grid like the school system reference; sortable, searchable, paginated.
6. Row Action	View only where detail drill-down is useful. Avoid too many action buttons.

Simple Layout Example

Report Name

Date From | Date To | Department/User/Status | Payment Method/Panel (where relevant) | **Filter** | Reset

Excel | PDF | Print

Main report table with totals at the bottom. Use KPI cards only on summary reports.

4. Final Notes

Note

Front Desk/Billing is the Hospital cash collection portal. Therefore My Balance Sheet and My Account Settlement are mandatory here.

Note

Keep Discounts, Refunds, Voids and Reversals as one report with a Type filter instead of four separate menu items.

Note

Card/POS and Online/Bank amounts appear in collection reports but are not counted as physical cash in the Balance Sheet.
