

HOSPITAL MANAGEMENT SYSTEM

Staff, Portal Access, Salary & Commission - Final Blueprint

CH Sharif and Saeed Hospital | Prepared by iSysware

Final Separation Rule

Staff Profile and Portal Access are separate modules. Every employee can exist as Staff without a system login. Only staff who need HMS access receive a separate Portal Account. Salary and Commission are also separate financial structures: Salary is attendance-driven; Commission is service-driven.

1. Overall Architecture

Module	Purpose	Key Rule
Staff Master	HR/employment record for every employee.	Exists even if the staff member never logs into HMS.
Portal Access	Separate login/security account for selected staff.	Linked to Staff; controls portal, role, credentials and account status.
Shift & Schedule	Shift assignment and day-wise timings.	Shift comes from Hospital Overview / Shift Master.
Attendance	Daily attendance record.	Primary source for salary earning.
Salary Profile	Base salary/rate, salary type, tax, deductions/allowances.	Effective-dated; salary is attendance-based.
Commission Rule	Service-wise commission setup.	Separate from salary; service-driven.
Payroll Run	Period salary calculation.	Daily / Monthly / Custom.
Commission Run	Period commission calculation.	Daily / Monthly / Custom.
Salary Payment	Actual salary payment.	Separate ledger/payment status.
Commission Payment	Actual commission payment.	Separate ledger/payment status.

2. Staff Add Wizard

Step	Section	Fields / Actions
1	Basic Information	Staff Code auto, Full Name, Father/Guardian, CNIC/ID, Gender, DOB, Photo, Mobile, Email, Address.
2	Employment	Joining Date, Staff Type, Staff Category, Designation, Employment Status.
3	Professional	Qualification, Specialization, License/Registration, Experience - conditional by staff type.
4	Department & Service	For doctors/clinical staff: multi-department + multi-service assignment.
5	Shift	Select configured Shift Master, effective date.
6	Weekly Timing	Monday-Sunday working status, start/end time, break, shift default/override.
7	Salary Setup	4 salary types, monthly/daily rate, tax, allowances/deductions, effective date.
8	Commission Setup	Only if eligible; service-wise fixed or percentage commission.
9	Bank / Account Details	Salary/commission payment account information.
10	Review & Save	Create Staff record. Portal login is NOT created here.

3. Staff Master Fields

Group	Fields
Identity	Staff ID/Code, Full Name, Father/Guardian Name, CNIC/ID No, Gender, DOB, Photo.
Contact	Primary Mobile, Alternate Mobile, Email, Address, City.
Emergency	Contact Name, Relation, Mobile.
Employment	Joining Date, Staff Type, Staff Category, Designation, Status.
Professional	Qualification, Specialization, License/Registration No, Experience.
HR Notes	Optional remarks/documents.
Audit	Created By/At, Updated By/At.

4. Bank / Account Details

Field	Rule
Payment Method	Cash / Bank Transfer / Online.
Bank Name	Optional if Cash; required for bank payment.
Branch Name	Optional.
Account Title	Required for bank payment.
Account Number	Required for bank payment.
IBAN	Optional/required by hospital banking policy.
Wallet / Online Account	Optional for approved online payment methods.
Preferred Salary Account	Yes/No.
Preferred Commission Account	Yes/No; may be same or different if policy permits.
Account Status	Active / Inactive.

Effective From	Preserves history when account details change.
----------------	--

5. Separate Portal Access Module

UI Concept

Use a separate 'Portal Users / Access Accounts' screen similar to the referenced school Accountant screen: summary cards, searchable table, Add New Account button, and a small modal/form for creating login access.

Portal Account Field	Description
Staff	Search/select existing Staff record.
Display Name	Auto from Staff, editable only if policy allows.
Email / Username	Login identifier; must be unique.
Password	Set initial password or generate/reset flow.
Portal	Admin / Front Desk-Billing / Admission / Inventory Management.
Role	Role available inside selected portal.
Account Status	Active / Restricted / Inactive.
Login Enabled	Yes/No.
Force Password Change	Yes/No on first login.
Last Login	Read-only.
Created By / At	Audit.
Updated By / At	Audit.

Important Access Rule

Do not infer portal access from Staff Type. A person may be a Manager but have Admin access; a nurse may have no portal login; a Front Desk employee may receive Front Desk/Billing access. Portal Access is explicitly assigned in the security module.

Example	Staff Master	Portal Account
Doctor	Doctor, Pediatrics, Consultant	Optional; may have no login or a permitted portal/clinical account.
Billing Officer	Front Desk/Billing staff	Portal = Front Desk/Billing.
Admission Officer	Admission staff	Portal = Admission.
Inventory Officer	Inventory staff	Portal = Inventory Management.
Hospital Manager	Management	Portal = Admin if authorized.

6. Staff Type / Category / Designation

Master Data Rule

Staff Type, Staff Category, Designation and Shift should be configurable from Hospital Overview / management setup and loaded into Staff Add forms. Do not hardcode these values.

Example Type	Example Categories / Designations
Doctor	Consultant, RMO, Medical Officer, Surgeon, Pediatrician, Anesthetist.
Nurse	Staff Nurse, Head Nurse, ICU Nurse, Ward Nurse.
Front Desk / Billing	Receptionist, Cashier, Billing Officer.
Management	Manager, Operations Manager, HR/Admin.
Support	Peon, Ward Boy, Cleaner, Security, Driver.
Technical	Lab Technician, Radiology Technician, IT Support, other configurable.

7. Doctor Department & Service Assignment

Field	Rule
Clinical Departments	Multi-select. A doctor may belong to multiple departments.
Primary Department	Optional default department.
Allowed Services	Multi-select from Service Master.
Service Active	Yes/No.
Commission Eligible	Yes/No per service.
Commission Basis	Percentage or Fixed per service.
Commission Value	Rate/value.
Effective From / To	Historical protection and future rate changes.
Approval	Optional approval for commission rule changes.

Service Commission Source

Commission is created only from an eligible completed service transaction linked to that doctor/staff member. Department membership alone does not create commission.

8. Shift Assignment & Weekly Timing

Field	Behaviour
Assigned Shift	Dropdown from Shift Master.
Effective From	Date shift starts.
Working Days	Monday-Sunday toggles.
Start Time	Per-day start time.
End Time	Per-day end time.
Break	Optional minutes.
Use Shift Default	Yes/No.
Day Override	Custom timing on a specific day.
Weekly Off	OFF day.
Grace / Late Policy	Use global policy or controlled override.

9. Required Salary Types

Salary Type	Base Salary Calculation	Commission
Monthly	Attendance-prorated monthly base.	No.
Monthly + Commission	Attendance-prorated monthly base.	Yes - separately calculated.
Daily	Daily rate x payable attendance equivalent days.	No.
Daily + Commission	Daily rate x payable attendance equivalent days.	Yes - separately calculated.

10. Salary Profile Fields

Field	Purpose
Salary Type	Monthly / Monthly + Commission / Daily / Daily + Commission.
Monthly Base	Required for monthly types.
Daily Rate	Required for daily types.
Effective From / To	Historical salary profile control.
Tax Mode	Percentage / Fixed.
Tax Value	Percentage or amount.
Fixed Allowance	Optional recurring allowance.
Fixed Deduction	Optional recurring deduction.
Attendance Policy	Present, half day, paid leave, unpaid leave, absent handling.
Overtime Rule	Optional, if enabled.
Payment Method	Cash / Bank / Online.
Status	Active / Inactive.

11. Attendance-Based Salary Calculation

Salary Source

Salary is always earned from attendance for the selected payroll period. Scheduled days and attendance status are used to determine payable attendance equivalent days.

Attendance Status	Default Payable Equivalent
Present	1.00 day
Half Day	0.50 day
Absent	0.00 day
Paid Leave	1.00 day if approved paid leave policy applies
Unpaid Leave	0.00 day
Late / Early Out	As configured by attendance policy - may remain present, create deduction, or become half day.

Formula	Calculation
Attendance Equivalent Days	Present + (Half Days x 0.5) + Approved Paid Leave Equivalent.
Monthly Per-Day Rate	Monthly Base / Scheduled Payable Days in the payroll period.
Monthly Earned Base	Monthly Per-Day Rate x Attendance Equivalent Days.
Daily Earned Base	Daily Rate x Attendance Equivalent Days.
Gross Salary	Earned Base + Approved Allowances + Overtime + Positive Salary Adjustments.
Tax - Percentage	Gross Salary x Tax %.
Tax - Fixed	Configured Fixed Tax Amount.
Net Salary	Gross Salary - Tax - Other Deductions - Negative Adjustments.

12. Monthly Salary Example

Example

Monthly Base = PKR 60,000. Scheduled Payable Days = 30. Present = 26, Half Days = 1, Paid Leave = 1, Absent = 2. Attendance Equivalent = $26 + 0.5 + 1 = 27.5$ days. Per-Day Rate = $60,000 / 30 = \text{PKR } 2,000$. Earned Base = $2,000 \times 27.5 = \text{PKR } 55,000$. Allowance = PKR 2,000. Gross = PKR 57,000. Tax 5% = PKR 2,850. Other Deduction = PKR 1,000. Net Salary = PKR 53,150.

13. Daily Salary Example

Example

Daily Rate = PKR 3,000. In a 10-day custom period, Attendance Equivalent = 8.5 days. Earned Base = $3,000 \times 8.5 = \text{PKR } 25,500$. If tax is fixed PKR 500 and other deduction PKR 300, Net Salary = PKR 24,700 before any approved allowance/overtime.

14. Commission Structure - Separate from Salary

Commission Rule Field	Meaning
Staff / Doctor	Who earns commission.
Department	Optional scope.
Service	Eligible Service Master item.
Basis	Percentage / Fixed Per Service.
Value	% or fixed amount.
Calculation Base	Recommended: eligible Net Service Amount after service discount, or fixed completed service quantity.
Effective From / To	Rate history.
Status	Active / Inactive.
Approval Fields	Configured By / Approved By if required.

Commission Type	Formula
Percentage	Eligible Net Service Amount x Commission %.
Fixed Per Service	Completed Eligible Service Quantity x Fixed Commission Amount.
Refund/Reversal	Create linked negative commission adjustment proportional to reversed eligible service.
Voided/Cancelled Service	Commission = 0.
Uncompleted Service	Commission = 0 unless hospital explicitly changes policy.

15. Percentage Commission Example

Example

Doctor has 15% commission on an eligible service. Standard service amount = PKR 10,000, approved service discount = PKR 1,000, eligible net service amount = PKR 9,000. Commission = $9,000 \times 15\% = \text{PKR } 1,350$. If the service is later fully refunded, a linked commission reversal of PKR 1,350 is posted.

16. Fixed Commission Example

Example

Doctor earns PKR 500 per completed eligible consultation. During the selected period 12 eligible consultations are completed. Commission = $12 \times 500 = \text{PKR } 6,000$. Cancelled or voided consultations are excluded.

17. Monthly + Commission Example

Example

Net Salary from attendance = PKR 53,150. Eligible monthly service commission = PKR 18,000. These are NOT merged into one payroll figure. Salary Payment = PKR 53,150 and Commission Payment = PKR 18,000 are separate records, approvals, payment statuses and statements.

18. Daily + Commission Example

Example

Daily Salary Net for selected date = PKR 2,850 after tax/deduction. Same date has 3 eligible services at PKR 500 fixed commission each = PKR 1,500 commission. Salary Payment PKR 2,850 and Commission Payment PKR 1,500 remain separate.

19. Salary Run Workflow

Stage	Behaviour
Select Run	Daily / Monthly / Custom.
Choose Period	Single date, month, or From-To.
Filter	Department, Staff Type, Staff, Status.
Preview	Show scheduled days, attendance, earned base, allowances, tax, deductions, net salary.
Generate	Create Payroll Run + Payroll Lines.
Review	Management verifies.
Approve	Locks posted calculation.
Pay	Create separate Salary Payment.
Correct	Use Salary Adjustment/Reversal; never overwrite approved history.

20. Commission Run Workflow

Stage	Behaviour
Select Run	Daily / Monthly / Custom.
Choose Period	Single date, month, or From-To.
Filter	Department, Doctor/Staff, Service.
Preview	Completed eligible services, net eligible amount, rule, earned commission, reversals.
Generate	Create Commission Run + Lines.
Review	Verify service eligibility.
Approve	Locks calculation.
Pay	Create separate Commission Payment.
Correct	Use Commission Adjustment/Reversal.

21. Daily / Monthly / Custom Behaviour

Run Type	Salary	Commission
Daily	Calculate that day's attendance-equivalent salary earning.	Calculate eligible services completed on that date.
Monthly	Calculate selected month's attendance-based salary.	Calculate eligible services for the selected month.
Custom	Calculate From-Date to To-Date salary; useful for partial periods and settlements.	Calculate commission for exactly the same selected custom period if desired.

22. Separate Payment Structures

Area	Salary	Commission
Calculation Source	Attendance + Salary Profile	Eligible completed Services + Commission Rules
Generation	Payroll Run	Commission Run
Approval	Payroll Approval	Commission Approval
Payment	Salary Payment	Commission Payment
Statement	Salary Slip	Commission Statement
Adjustment	Salary Adjustment/Reversal	Commission Adjustment/Reversal
Reporting	Payroll/Salary Reports	Commission Reports
Bank Account	Preferred Salary Account	Preferred Commission Account or same account

23. Recommended Data Structures

Entity	Purpose
Staff	Core employee profile.
StaffType / StaffCategory / Designation	Configurable HR masters.
PortalUserAccount	Separate login account linked to Staff.
Role / Permission	Portal security.
StaffDepartment	Many-to-many department assignment.
StaffService	Allowed services and commission eligibility.
ShiftMaster	Configured in Hospital Overview.
StaffShiftAssignment	Effective-dated shift assignment.
StaffWeeklySchedule	Day-wise timing.
StaffBankAccount	Payment/account details.
SalaryProfile	Salary type/rate/tax/deductions/allowances.
Attendance	Daily attendance.
PayrollRun / PayrollLine	Generated salary.
SalaryPayment	Actual salary payment.
SalaryAdjustment	Correction/reversal.
CommissionRule	Service commission rule.
CommissionEarning	Transaction-linked earning.
CommissionRun / CommissionLine	Generated commission.
CommissionPayment	Actual commission payment.
CommissionAdjustment	Correction/reversal.

24. Final Non-Negotiable Rules

- Staff Master and Portal Access are separate.
- Staff Type does not automatically grant portal access.
- Portal Access is explicitly assigned to an existing Staff record.
- Staff bank/account details are stored separately and effective-dated.
- Doctors can belong to multiple Clinical Departments and multiple Services.
- Four salary types are required: Monthly, Monthly + Commission, Daily, Daily + Commission.
- Salary is attendance-based.
- Commission is service-based.
- Salary and Commission have separate calculation, approval, payment, adjustment and reporting structures.
- Both Salary and Commission can run Daily, Monthly or Custom.
- Tax supports Percentage or Fixed Amount on Salary Profile.
- Approved payroll/commission is never silently edited; corrections use adjustment/reversal.
- Every create/update/approval/payment stores actual actor and timestamp.

Recommended Build Order

1) HR Masters -> 2) Staff Add Wizard -> 3) Bank Details -> 4) Department/Service Assignment -> 5) Shift & Weekly Schedule -> 6) Separate Portal Access -> 7) Attendance -> 8) Salary Profile -> 9) Commission Rules -> 10) Payroll Run -> 11) Commission Run -> 12) Separate Payments -> 13) Reports/Audit.
